

MARINE SERVICE MANUALS

SELOC SERVICE & REPAIR MANUALS

Seloc Marine engine maintenance and repair manuals offer the most comprehensive, authoritative information available for outboard, inboard and stern-drive engines, as well as personal watercraft. Seloc has been the leading source of how-to information for the marine industry since 1974. Designed and written to serve the needs of the professional mechanic, do-it-yourself boat enthusiast, instructor and student, these manuals are based on actual tear-downs done by Seloc's editors/authors in our on-site facility. Recognized and used by technical trade schools as well as the military, every manual provides complete coverage on everything from basic maintenance to engine or drive overhaul; featuring simple-to-follow, step-by-step, illustrated procedures, hundreds of exploded drawings, photographs and tables, maintenance intervals, troubleshooting sections, accurate specifications and extensive wiring diagrams. New on all later manuals is an extensive skill rating system for each procedure which also includes special tool icons.

OUTBOARDS

Seloc Publishing has been an innovator in helping boaters maintain and repair their outboard and inboard engines for over 30 years. From performing actual teardown procedures to digital photography, Seloc has been there all the way.

Now Seloc has taken repair into the 21st century by allowing subscribers to access our electronic database via the internet for up-to-the-minute information on their engine. Never before has repair information been so easily accessible.

Our unit repair sections contain detailed step-by-step instructions and thousands of photos and illustrations (color in newer models) that leave no system uncovered. What more could you ask for - all of the quality and content you've come to expect from our print manuals is there, plus quick access buttons for Repair, Specifications, Maintenance Intervals and Wiring Diagrams. Information retrieval is easy - Quick Access tabs, Explorer-style Table of Contents or a hyper-linked Search Index; we make it easy to find the information you need, when you need it.

We're also creating a growing parts database with thousands of parts offered by a major aftermarket parts supplier. And finally, newly expanded this year is our dealer/retailer database which allows you to search for parts and service providers by zip code.

Subscribing to SelocOnLine allows the user unlimited access to a single make/model/year engine/drive system for three years.

Check with us for updates, but our growing coverage includes all models covered in the accompanying books when so noted. Simply look for the SelocOnLine icon underneath the books and know that all models covered in that manual are also available on line!
